To Whom It May Concern

Please accept this letter as reference for R&B Cormier Inc.

R&B Cormier has provided contracting services in support of Ontario's Forest Resources Inventory Program since the mid 1990's. They have provided a variety of services for the provincial inventory program including field sampling for calibration of air photo interpretation, air photo interpretation, GIS production, individual feature recognition projects and a variety of smaller projects related to forest inventory.

R&B Cormier has completed forest inventory production for both the Ministry of Natural Resources and forest industry in Ontario. Their work has always been completed effectively and efficiently and the company continues to be forward thinking with respect to inventory technology. They have proven to be innovative partners who can focus experienced resources on any size project.

The current project that R&B Cormier is completing for the provincial forest inventory program in Quetico Provincial Park has been their best work to date. They have adapted easily to the new enhanced FRI production stream and continue to demonstrate their commitment to excellence.

I would be happy to discuss the high quality and productivity of R&B Cormier's forest inventory work if you feel further information is required.

Murray Radford
Coordinator, Ontario's Forest Resources Inventory,
Ecological Land Classification and
Growth and Yield Programs
